

NUEVA HILERA

BUILDING SPECIFICATIONS

Indicative image

Nueva Hilera is a residential development strategically situated in the center of Malaga, near the El Corte Inglés and a short walk from the historic town center.

1 and 2 bedroom flats with parking space and storage room housed in a modern building with a contemporary design. There is also a shared central space for enjoying everyday life, with all services within easy reach.

FOUNDATION, STRUCTURE AND ROOFING

- **Nueva Hilera** stands on a reinforced concrete structure. It is compliant with current regulations and construction is supervised by an external technical expert.
- The roofing is flat, waterproofed and thermally insulated according to the requirements of the Technical Construction Code, to ensure they are watertight.

FACADES

- The facades are designed to have a smooth painted finish. They are directly clad with plasterboard and insulation, providing a high level of thermal and acoustic insulation.

EXTERIOR JOINERY

- The exterior joinery is made of PVC, with double glazing and air gap, which adds to the thermal and acoustic comfort of the living space.
- All windows of the bedrooms and living rooms have polyurethane injectected aluminium roller shutters.

INTERIOR JOINERY

- The entrance door to the apartment is reinforced, smooth and lacquered in white on the inside and finished in wood on the outside.
- The interior doors are smooth and lacquered in white.
- The built-in storage is modular. The doors are lacquered in white and can be sliding or folding depending on the type of home. They are lined with textured boards.
- The wardrobes in bedrooms have railings, shelves and drawers.
- The storage in the hall has a railing for clothing and a shelf for bags.

INTERIOR DIVIDING WALLS

- The interior walls are made of plasterboard and interior insulation.
- Homes are separated by sound-dampening brick walls clad with plasterboard and insulation on both sides. This system provides acoustic insulation in compliance with regulations.

PAINT AND CEILINGS

- Smooth plastic paint in horizontal and vertical surfaces.
- False ceilings are installed in those areas required for installations, with registers where necessary..
- The rest of the ceilings are covered with plaster.

BATHROOMS

- The walls of the bathrooms combine two ceramic tile designs. The floors have matching tiles.
- Bathrooms have white glazed porcelain sanitary appliances, with a resin shower tray.
- Chrome finish single-lever faucets with water saving system.
- Sinks are delivered with white furniture.

Possibility of choosing and swapping between option 1 and 2 of tiling and flooring.

- Domestic hot water is produced by means of an individual installation of Aerothermal for DHW (with accumulation).

- Homes have individual air conditioning through ducts and grilles leading to the living room and bedrooms.

- Ventilation system in accordance to the CTE-H-3 (Technical Construction Code-Health, Ventilation.)

- The electrical installation of all homes complies with the Low Voltage Electro technical Regulations, with electrical mechanisms of current design.
- The living rooms, bedrooms and kitchens of the apartments have Telecommunications installation sockets, according to current regulations in force.

- In **Nueva Hilera** the portals are decorated according to the design of the building, using a careful combination of materials.
- Automatic color video entry phone with terminal in the entrance hall.
- The building has elevators with cabins adapted for people with reduced mobility, with access to garage.
- The garage has forced ventilation, carbon monoxide detection and control and fire and emergency lighting, according to current regulations. It also has a pre-installation for recharging electric vehicles according to R.E.B.T. regulations.
- Low consumption LED lighting in accesses and communal areas.
